What is the difference between the Internet and the world wide web?

Identify the elements of each

Internet

WWW

sounds pictures network of networks
computers links August 6, 1991- debut programs use it
videos cables sends packets of data
Tim Berners-Lee documents Vint Cerf & Bob Kahn

Feb 26-8:58 AM

Explain what
Flattner #2 is.

Feb 26-8:58 AM

Which of the following are impacts of Netscape and the public WWW?

Impact

Not an impact

Led to the Dot.com bubble

led to the over-investment in fiber
cable (fiber optic bubble)

no one knows you're a dog

Feb 26-8:58 AM

* Basic definition - Information that can be depended upon with confident certainty; absence of NO error, breakdown, or or performance.

* Technology definition - The trustworthiness to do what the system is expected or designed to do. Any system that consistently produces the same results

* Computer Networking definition - A reliable protocol ensuring reliability properties with respect to the delivery of data to the intended recipient(s), as opposed to unreliable protocol, which does not guarantee that data will be delivered intact, or that it will be delivered at all.
